WAPC Western Australian Planning Commission

STATION PRECINCTS HERITAGE POLICY (DRAFT)

Prepared under Station Precincts Improvement Scheme No. 1

Policy number	**1.0**
Policy name	**Station Precincts Heritage Policy**
Responsible authority	**Western Australian Planning Commission**
Improvement scheme	**Station Precincts Improvement Scheme No. 1**
Adoption date	**[insert adoption date]**

1. Introduction

Heritage is an important part of the identity, character and amenity of station precincts and can contribute to attractive, distinctive and well-designed places. Station Precincts Improvement Scheme No. 1 supports increased housing, activity and investment close to public transport, while recognising the cultural heritage significance of places included on the Heritage List.

This policy guides how that significance is considered in the assessment of development applications to support change, adaptation and high-quality development that responds appropriately to the heritage place and its setting. Heritage conservation and new development are not necessarily competing objectives and, with careful design, can form part of an integrated planning outcome.

For places included on the Heritage List adopted under Station Precincts Improvement Scheme No. 1, this policy provides guidance on how heritage matters are to be addressed. Where development affects a place entered in the State Register of Heritage Places, the *Heritage Act 2018*, *State Planning Policy 3.5 Historic Heritage Conservation* and the policies and guidelines of the Heritage Council of Western Australia apply.

2. Citation

This policy may be cited as the Station Precincts Heritage Policy.

This policy is adopted and published by the Western Australian Planning Commission (Commission) under the Station Precincts Improvement Scheme No. 1.

3. Purpose

To identify places of cultural heritage significance and worthy of built heritage conservation that have been entered on the local government heritage list within Station Precincts Improvement Scheme No. 1 and guide the information, assessment and decision making requirements for development affecting those places.

4. Application

This policy applies to any works affecting a heritage place included on the Station Precincts Heritage List that require development approval.

Development affecting a place entered in the State Register of Heritage Places is subject to the *Heritage Act 2018*, *State Planning Policy 3.5 Historic Heritage Conservation* and the policies and guidelines of the Heritage Council of Western Australia.

5. Objectives

The objectives of this policy are to —

a. conserve and protect places of cultural heritage significance,
b. ensure that cultural heritage significance is given appropriate weight in planning decision making,
c. provide a framework to support assessment of the likely impact of development on places included on the Heritage List, and
d. ensure that information required with an application is proportionate to the cultural heritage significance of the place and the likely impact of the proposed development.

DRAFT

6. Use of Terms

Unless otherwise noted, terms used in this policy have common meanings and include those defined in the *Planning and Development Act 2005*, the deemed provisions, and the *Heritage Act 2018*.

Cultural heritage significance means aesthetic, historic, scientific, social or spiritual value for individuals or groups within Western Australia.

Decision maker means the Commission, or any person or body exercising delegated authority on behalf of the Commission under Station Precincts Improvement Scheme No. 1.

Fabric means all the physical material of the place.

Impact means the manner in which proposed works will, or are likely to, affect the cultural heritage significance of a place.

Impact Matrix means the matrix at Schedule 2, which provides guidance for identifying the likely impact of proposed development on the cultural heritage significance of a place.

Heritage place means a place that is included on the Station Precincts Heritage List.

Relevant improvement plan date means the date on which an improvement plan authorising Station Precincts Improvement Scheme No. 1, or an amendment to that Scheme, was gazetted.

Significant fabric means fabric identified as contributing to the cultural heritage significance of the place.

Station Precincts Heritage List means the heritage list established and maintained by the Commission under clause 8 of the deemed provisions, as applied by Station Precincts Improvement Scheme No. 1.

7. Policy Provisions

7.1 Station Precincts Heritage List

The Station Precincts Heritage List is set out in Schedule 1 and includes a place where, immediately before the relevant improvement plan date, the place was included on a local government heritage list applying to land within the Scheme area.

Note: *Clause 8 of the deemed provisions sets out requirements for preparing and maintaining a Heritage List. The Commission may, from time to time, amend the Station Precincts Heritage List in Schedule 1, including by adding places to, or removing places from the list in accordance with those requirements.*

7.2 Heritage areas

Heritage areas that were designated under a local planning scheme that applied to land in the Scheme area before Station Precincts Improvement Scheme No. 1 came into operation do not apply under the Improvement Scheme or this policy.

7.3 Development assessment

In considering any planning applications in relation to a heritage place the decision maker should apply and give due regard to the development control principles set out in the policy and State Planning Policy 3.5 – Historic Heritage Conservation.

7.4 Application information

7.4.1 In addition to the information required under the deemed provisions, the decision maker may require an application for development approval affecting a place included on the Heritage List

DRAFT

to be accompanied by information necessary to assess the likely impact of the proposed development on the cultural heritage significance of the place, including —

a. a written explanation of how the proposed development may affect the cultural heritage significance of the place and how the design responds to that significance,
b. photographs showing the place and the part affected by the proposed development
c. plans identifying existing fabric to be retained, altered or removed,
d. a site and context analysis showing the relationship of the proposed development to the heritage place, adjoining development and any significant views to or from the place,
e. visual representations showing the scale, form and location of the proposed development in relation to the heritage place,
f. details of proposed materials, finishes and colours, and
g. any other information reasonably required by the decision maker to assess the likely impact of the proposed development.

7.4.2 The information required under clause 7.4.1 is to be proportionate to the cultural heritage significance of the place and the nature and likely extent of the impact.

7.5 Heritage impact statement

7.5.1 The decision maker may require a heritage impact statement where the significance of the place and the likely impact of the proposed development warrant detailed heritage assessment. In making this determination, the decision maker may have regard to the Impact Matrix at Schedule 2. A proposal assessed as likely to result in a moderate or major negative impact under the Impact Matrix is likely to warrant a heritage impact statement.

7.5.2 A heritage impact statement is to be prepared in accordance with the Heritage Impact Statement Guide published by the Heritage Council of Western Australia. Its scope and level of detail are to be proportionate to the significance of the place and the likely impact of the proposed development.

7.6 Heritage assessment may be required

7.6.1 The cultural heritage significance of a place is to be identified from the relevant entry in the Heritage List and any supporting Local Heritage Survey, conservation plan or other heritage assessment.

7.6.2 Where the information referred to in clause 7.6.1 does not adequately identify the cultural heritage significance of the place or the elements that contribute to that significance, the decision maker may require a heritage assessment to be provided.

7.6.3 A heritage assessment required under clause 7.6.2 is to be prepared by a suitably qualified heritage professional and be consistent with the relevant guidelines published by the Heritage Council of Western Australia.

7.7 Structural condition assessment

7.7.1 Where the structural condition of a heritage place is relied on to justify the demolition of significant fabric, the decision maker may require a structural condition assessment prepared by a registered structural engineer with relevant heritage experience.

7.7.2 In considering a proposal referred to in clause 7.7.1, the decision maker may have regard to —

a. the nature and extent of any structural failure,
b. whether retention, repair or adaptation of the significant fabric is reasonably practicable,
c. whether the structural condition of the place has resulted from inadequate maintenance,
d. the cultural heritage significance of the fabric proposed to be demolished,
e. the extent of demolition and its effect on the cultural heritage significance of the place, and

DRAFT

f. any conservation benefits, planning benefits or other relevant outcomes arising from the proposal.

7.8 Variations of Improvement Scheme requirements

7.8.1 A site or development requirement may be varied where the variation would facilitate the conservation of a place included on the Station Precincts Heritage List.

Note: *The ability to vary a site or development requirement for heritage conservation purposes is provided for in the deemed provisions, as applied by Station Precincts Improvement Scheme No. 1.*

7.8.2 In considering whether to approve a variation, the decision maker may have regard to —

a. the cultural heritage significance of the place,
b. the conservation outcome to be achieved,
c. whether the variation is necessary and appropriate to support that outcome,
d. the likely impact of the variation on the heritage place, surrounding development and the amenity of the locality, and
e. the objectives and requirements of Station Precincts Improvement Scheme No. 1.

7.8.3 A variation may relate to building height, setbacks, plot ratio, deep soil area or other development requirements, where the decision maker is satisfied the variation would support an appropriate heritage and planning outcome.

7.9 Conditions of approval

A condition of development approval may require measures to conserve the cultural heritage significance of a heritage place; avoid, minimise or manage adverse impacts; or document or interpret the place, including —

a. conservation works,
b. an archival record,
c. interpretation material, or
d. any other measure considered appropriate by the decision maker.

8. Review

This policy should be reviewed within three years of commencement and every five years thereafter. The review should consider the effectiveness of this policy in supporting the conservation of heritage places, the management of development affecting cultural heritage significance, and the use of heritage assessment, heritage impact statements, conditions and variations to achieve appropriate heritage and planning outcomes.

DRAFT

Schedule 1: Station Precincts Heritage List

This Schedule constitutes the Heritage List for Station Precincts Improvement Scheme No. 1. Places included in this Schedule are included on the Station Precincts Heritage List for the purposes of clause 8 of the deemed provisions of the Planning and Development (Local Planning Schemes) Regulations 2015, as applied by the Scheme.

Other heritage-protected places may also be located within the Scheme area. These include places entered in the State Register of Heritage Places and afforded protection under the *Heritage Act 2018*, places under consideration for entry in the State Register, places subject to a protection order under the *Heritage Act 2018*, and places subject to a heritage agreement under that Act. Heritage areas, as defined under clause 8 of the deemed provisions, do not apply to the Scheme area.

Schedule 2: Impact Matrix

The Impact Matrix provides guidance for identifying the likely effect of proposed development on the established cultural heritage significance of a heritage place. Impact is to be considered separately against each value or criterion relevant to the significance of the place. The decision maker may have regard to the Impact Matrix in determining whether a heritage impact statement is required under clause 7.5. The Impact Matrix does not reassess the cultural heritage significance of the place, replace a heritage impact statement or determine whether a proposal should be approved.

Impact *(Level of impact to be assessed separately for each criterion)*	**Values**				**Rarity**	**Representativeness**	**Condition**	**Integrity**	**Authenticity**	**Demolition**
	Aesthetic including streetscape and setting	**Historic**	**Scientific including archaeology**	**Social**						
Positive	Development that enhances the aesthetic value.	Development that conserves the historic value and interprets the history of the place.	Development that protects and/or reveals scientific value through interpretation.	Development that enhances a sense of place through retention of use associations, meaning and/or interpretation.	Enhances by retaining or conserving element(s) that contribute(s) to rarity.	Enhances by retaining or conserving element(s) that contribute(s) to representativeness.	Development that maintains, preserves or restores significant fabric to a known earlier state.	Development retains and enhances original fabric through good conservation practice.	Retains and enhances authenticity of the place through retention or reinstatement of original use, associations and meaning.	Demolition or removal only of element(s) identified in a heritage assessment as intrusive.
No Discernible Impact	Development that maintains or has no impact on the aesthetic value.	Development that does not affect the historic value.	Development does not affect known or potential scientific/archaeological value.	Development does not affect the social value of the place.	There is no loss or proposed change that affects rarity.	There is no loss or proposed change that affects representativeness.	Development that maintains, stabilises or preserves significant fabric in its current state without contributing to its deterioration.	Development does not affect the condition of fabric that contributes to the place's significance.	Development does not affect the authenticity of the place.	Demolition or removal of element(s) identified in a heritage assessment as being of little significance.
Minor (negative)	Development that does not detract from the aesthetic value. May include minor alterations to the appearance of the place.	Development that does not detract from the historic value and may include minor alterations to the place either internally or externally.	Development does affect areas of little or some scientific value and is consistent with an appropriate Management Plan.	Development results in loss of fabric or change of use of a place that has some past but lapsed association with the community.	Results in a change to an element that contributes to rarity but impact can be mitigated by interpretation.	Results in a change to an element that contributes to representativeness but impact can be mitigated by interpretation.	Development that could be detrimental to the condition of significant fabric but can be mitigated by providing advice and conditional support.	Does not substantially detract from the integrity of the place. May include minor alterations to the place to provide for a new or continued use.	Development that does not detract from the authenticity of the place. May include change of use for compatible re-use.	Partial demolition or relocation of element(s) identified in a heritage assessment as being of some significance.
Moderate (negative)	Development that extensively reconstructs fabric to reproduce an earlier state or materially alters the appearance of a place through adaptations, additions or construction of new fabric.	Development that extensively reconstructs fabric to reproduce an earlier state or materially alters significant fabric through adaptation, construction of new fabric or change of use.	Development that is not informed by a conservation or archaeological management plan and may affect potential scientific value.	Development results in a significant loss of fabric or use of a place that has a strong and current association with the community.	Element that contributes to rarity is lost and impact cannot be mitigated.	Element that contributes to representativeness is lost and impact cannot be mitigated.	Development that is likely to lead to loss or deterioration of the structural integrity of the place, or the loss or deterioration of any element of the place that is integral to its cultural heritage significance.	Development results in a significant loss of fabric or settlement pattern that contributes to the authenticity of the place.	Development that proposes a change of use that is not compatible with past uses and/or does not reflect the values of the place.	Demolition or removal of element(s) of some significance. Demolition, relocation of element(s) identified in a heritage assessment as being of considerable significance.
Major (negative)	New infill development on vacant lots (including those approved for total demolition), carparks, open space. New construction that retains a façade of historic fabric.	Development that significantly detracts from the historic value through adaptation or removal of significant element(s) or introduction of a new incompatible use.	Development that significantly affects or destroys known scientific values.	Development results in a total loss of place, or loss of a use that has a strong and current association with the community.	Development that results in a substantial loss of an element or area identified as contributing to the rarity of the place.	Development that results in a substantial loss of an element or area identified as contributing to the representativeness of the place.	Development that will result in deterioration in the condition of significant fabric and/or that fails to address an evident need for urgent conservation works.	Development results in a total loss of fabric and/or results in only the retention of a façade or shell of the significant fabric.	Development that proposes a change of use that is unsympathetic to the values of the place and detracts from the significance of the place.	Total demolition or removal or relocation of a building to an alternative site or dismantling and reconstruction of historic fabric. Partial demolition of elements of exceptional significance.
